Only For Research. Not For Diagnosis.

Synonyms:	YPYDVDPDYA
Attribute:	Mouse Monoclonal Antibody
Isotype:	IgG2a
Purity:	Antigen Affinity Purification
Application:	ELISA, WB, IP, IF
Reactivity:	Protein fused with HA tag
Immunogen:	Peptide YPYDVDPDYA
Buffer:	PBS with 0.1% sodium azide and 50% glycerol, pH 7.2
Storage:	Store at -20°C. Do not aliquot
Recommended Dilution:	WB: 1:2000-1:10,000 IP: 3ug/sample IF: 1:100-200

Western Blotting of HA-Tag fused recombinant protein with Anti-HA monoclonal antibody at dilution of 1:2000

Background:

The HA tag is derived from the HA-molecule corresponding to amino acids 98-106. It has been extensively used as a general epitope tag in expression vectors. Many recombinant proteins have been engineered to express the HA tag, which does not appear to interfere with the bioactivity or the biodistribution of the recombinant protein.

We focus on precise protein quantification
