

Product Name :	Rabbit Anti-Hemoglobin Polyclonal Antibody
Cat No. :	Pab0051
Synonyms of Antigen:	HB, HGB
Character:	Liquid
Application :	Immunoturbidimetry, Nephelometry, ELISA and Immunochromatography
Purity:	Antigen Affinity Purification
Buffer:	0.15M PBS, pH 7.5, 0.02% Azide
Storage:	4°C for 6 months
Background:	Blood in the stool can occur when a polyp or tumor pulls away slightly from the intestinal wall as stool moves past it, so that it is very important to quantitatively determine human hemoglobin level in a sample of human stool. This antibody, generated by natural human hemoglobin, reacts only with human hemoglobin in fresh samples, but not any hemoglobin from food source. It is necessary for highly sensitive and accurate detection of hemoglobin in samples.
